Jason,

Per our conversation earlier today, we will be producing weekly reports for analytical air, environmental, and asbestos community assessment results instead of daily reports due to the adjustments in turnaround time for analytical sampling. These reports will be sent out on Mondays and will include results received as of the previous Saturday. We will continue to produce daily summaries for community and work area real-time results in addition to communicating any potential concerns as they arise.

If you have any questions regarding this change, please feel free to reach out.

Thanks,

Dana Szymkowicz, Ph.D.
